Evaluation & Reflection	Students actively participated in life-wide learning activities. Life-wide learning activities were held for all F.1-6 students. For the selective programmes, students participated enthusiastically with good attendance and performance. Students need memorable, active and hands-on experience in life-wide learning. Life-wide learning completes students' education by extending their learning outside of regular lessons and classrooms, strengthening the curriculum.	The school expects to cover the seven learning goals through life wide activities supported by the Grant. For national identity and global perspective, overseas tours broaden students'horizons and extend their global perspective. Tour to China and trainings (e.g. school choir for national anthem) strengthen national identity. For breadth of knowledge, Life wide learning days held broadened students' breadth of knowledge'. For language proficiency, Overseas Study Tour to Australia and Sing Yin Bulletin Training enhanced students'language proficiency. "Hong Kong 200" Leadership Project, Student Leadership Programs & Training Camps trained students'generic skills. Digital Literacy was covered by competitive Programming Course and CodeCombat 2026, 3D Printing Workshop and STEAM Education and Cultural Exchange Tour 2025. Life Planning was covered by Student Docent for Community Training, Advanced Leadership Training Program and LWL Days. Students were also able to learn from professional tutors, coaches and conductors in trainings supported by the Grant. School Sports Teams & Physical Training are in line with healthy physical lifestyle. Life Education Programs support the mental health of students. Life-wide learning completes students' formal education by taking learning beyond standard classroom settings and textbook lessons, directly reinforcing and strengthening the core curriculum through practical, real-world application. The Grant supported students so they would not need to bear an expensive cost to be engaged in valuable learning experiences.	The school utilized the Grant fully to arrange appropriate life-wide activities for students. Activities held covered intellectual development, community service, physical and aesthetic development, career-related experiences, patriotic education, digital education, AI and STEAM education and student mental health. For activities held, students participated actively and met the expected target fully. Students participation and the large scoop and variety of activities provided contributed to the success of utilization of the grant. For activities related to sister school, resources from previous sister school grants were used. For the following year, the school would utilize the LWLSSG to provide more patriotic activities and sister school related activities to students.
